Laboratory Manual

Academic Year	:	2026-27	Semester	:	3 rd
Course code	:	ITUE203	Course name	:	WEB DEVELOPMENT FRAMEWORKS

Practical – 1:-

Project Initiation, Requirement Analysis, Sitemap, Wireframe, and GitHub Setup

Problem Statement:- Initiate the semester-long StudentHub portal by identifying the problem scope, user roles, key modules, navigation flow, and minimum 10 pages. Create a sitemap, low-fidelity wireframe, project folder structure, README file, and GitHub repository.

Objective:- To initiate the development of a semester-long StudentHub Portal by analyzing the problem requirements, identifying the target users and their roles, designing the key functional modules, creating a clear navigation flow, and planning a minimum 10-page website. The project also aims to establish a structured development workflow by preparing a sitemap, low-fidelity wireframes, project folder structure, README documentation, and a GitHub repository for version control and collaborative development.
