Laboratory Manual

Academic Year	:	2026-27	Semester	:	3 rd
Course code	:	ITUE203	Course name	:	WEB DEVELOPMENT FRAMEWORKS

Practical – 2:-

Semantic HTML5 Pages with Accessibility-Ready Structure

Problem Statement :- Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

Objective :- The objective of this practical is to develop static HTML5 web pages for the StudentHub portal using semantic HTML elements. It focuses on creating a clean and consistent page structure with proper headings, navigation, sections, and content hierarchy. The practical also aims to implement accessibility-friendly forms, images, links, and navigation. Students will learn to connect multiple pages and create a user-friendly website structure. Overall, it helps in developing well-organized, accessible, and readable web pages using HTML5.
